

Noble Klass Academy Group Clinic Sessions

What are the Group Clinic Sessions?

The group study sessions are designed to provide students a collaborative and flexible learning environment. In the scheduled hours, our teachers will provide professional instruction and practice problems to ensure students are proficient and up-to-date in their coursework.

How does it work?

Each subject will have a scheduled time session, and there will be a designated teacher per subject. **These sessions are not lecture-based.** Students are expected to come with their own school material and prompt teachers to assist them with coursework. Students can stay for however long they need help in the allotted time (2 hours per subject). In each session, the number of students will be limited to 6 for efficiency. Please contact us for more information.
